

# DIY Moth Repellent Sachets

## ***Materials:***

Muslin drawstring bags\*  
Decorative stamps and ink  
Cedar wood chips\*\*  
Whole cloves  
Dried rosemary  
Cedar wood essential oil\*\*\*

## ***Directions:***

- 1) If you would like to decorate the exterior of the muslin bags, stamping is a good option. Select a rubber stamp and ink, stamping the bag as desired. Standard ink intended for paper works well on muslin bags.
- 2) Fill the muslin bags approximately 90% full of cedar wood chips. For a small bag add a pinch of whole cloves and 1/2 tablespoon of dried rosemary. For larger bags add more.
- 3) To keep the scent of your sachets potent, consider adding 10 drops of cedar wood essential oil.
- 4) Once all of your ingredients have been added to your muslin bag, pull the drawstring tight.
- 5) Layer smaller sachets between layers of wool clothing in storage containers. For hanging garments, create larger sachets and hang them around the tops of clothes hangers.

### Helpful Tips:

- These aromatic sachets help keep wool-loving moths at bay. To keep the scent potent and most effective, add additional cedar wood essential oil to the contents through the season.
- These sachets are intended for one storage season, after which discard the contents and fill with fresh ingredients.
