

DIY Acorn Napkin Rings

Materials:

Wool roving
Hot water
Liquid dish soap
Acorn caps
Jute twine

Directions:

- 1) Prepare a small/medium bowl of hot water and 1 tablespoon of liquid dish soap.
- 2) Separate a smaller portion of your wool roving and pull apart the fibers to create a fluffy ball of wool.
- 3) Dunk the ball into the hot soapy water and then gently begin to roll it in cupped palms.
- 4) As the ball cools, re-submerge it in the water and then continue rolling.
- 5) As the ball becomes denser, apply firmer pressure as you roll it. Continue rolling and dunking the ball until it is solid, firm and dense.
- 6) Then gently pinch the sides of the ball to create more of an oblong form resembling an acorn.

- 7) Rinse the completed ball in clean water and set aside to dry.
- 8) Once the ball has dried completely, hot glue it into the cap of an acorn.
- 9) Fold your napkin and secure it with a length of natural jute twine. Then tie the felted acorn to the front of the napkin.
