

DIY Words on Wood

Materials:

Sticky pre-made letters
Rag/paint brush
Wood panel
Wood stain/paint

Directions:

- 1) Cut apart the pre-made letters from one another.
- 2) Position letters on the wood, begin with the most middle letter and work your way out attaching the stickers on the wood.
- 3) Dip a rag into the stain and brush over letters and wood panel. If you stained your wood ahead of time and would like to use a different color on top, dip a paint brush into your color of choice and paint the wood panel.
- 4) Let the stain/paint dry and then peel off letters.
